Declaration of the Use of Generative AI for Assessment Work

Student name: _____He Ningqiu_____

Student ID: ____P2625633_____

Module Code: _____AIHA8123-111_____

Assessment Title: _____Assignment One: Developing a Multi-Database Search Strategy Based on PICOS_____

Please make sure you understand the policy about using generative AI, and such use must be explicitly acknowledged. The teacher/supervisor responsible for the assessment will provide specific guidance regarding acceptable usage, based on the module learning outcomes and marking criteria of the assessment. Failure to follow the rules for your work constitutes academic dishonesty.

Please tick either one below.

☑ I have used generative AI in this assessment work

☐ I did not use generative AI in this assessment work (please go to sign)

Generative AI tool used (*name and version*): _____gpt-5.6 Sol_____

For each relevant area, briefly describe how the information was generated, as well as explain how the output was used in your work. Put N/A if not appropriate.

Type of Usage	Done by AI tools	Done by student
Brainstorming and idea generation	Suggested initial PICOS concepts and search terms based on the assignment requirements.	Selected the research question, reviewed the suggestions, and finalized the PICOS scope and inclusion criteria.
Rephrasing text or formulas or generating text applied directly to the task	Helped reorganize, rephrase, and translate the report from Chinese into English.	Reviewed and revised the wording and checked the final report for accuracy.

Generating literature/background review	Helped draft and refine a brief background section based on the assignment topic.	Reviewed the background and retained only information relevant to the assignment.
Coding programming tasks	N/A	N/A
Producing diagrams/figures	N/A – no AI-generated figures were used.	Captured and inserted all database screenshots from the searches performed.
Analysing data	Helped organize and compare the reported result counts from the sensitive and specific searches.	Checked the result counts against the screenshots and interpreted the database access limitations.
Other (please specify):	Suggested database-specific search terms, syntax, and search steps.	Entered and ran the searches where access was available, captured screenshots, and reported databases that could not be accessed.
